

Milkline Clear

Product codes & Pack size: BIO011B (1litre)

Where to use: Powerful cleaning solution for automatic coffee machines.

Daily Use Acid formula to clean milkstone deposits and sanitiser milk lines on automatic machines. Product will be used as part of the automatic cleaning cycle on the machine and will only be used if the cleaning cycle flushes the milk from the milkline first. **Please note!** if the machine does not flush/rinse out the fresh milk first this formula will curdle the milk so you need to recommend our alternative alkali based cleaning solution BIO011.

Weekly use for systems that use BIO011. Customer needs to ensure that the milk is flushed from the system first or that the machine is set to weekly clean cycle.
