

Vendshield

Product codes & Pack size: BIO014 (5 litre refill), BIO036 (1 litre dosing bottle), BIO036A (25 litre container)

Where to use: Powerful cleaning solution for traditional vending machines use on brewer units, machine facias and components such as whipper bowls on traditional vending machines.

Key Benefits v Competition

- 4 in 1 formula destains, sanitises, cleans and lightly descales
- brewer units, machine fascias and components
- Eliminates the need for multiple cleaning products
- Non-corrosive will not damage or degrade machine components.
- Easy to use dosing bottle prevents wastage
- Fast acting formula reduces cleaning times
- Regular cleaning helps maintain beverage quality, prolongs
- machine life and can reduce maintenance costs

Usage/Dilution rates:

Brewer Chamber Cleaning For heavy soiling use 50ml of solution poured directly into brewer chamber and 25ml of solution for light soiling. Fill brewer chamber with hot water and leave product to soak for 10mins and then flush through.

Component Soaking & Cleaning For heavy duty cleaning use 100ml of solution per litre of hot water and for light duty use 50ml of solution per litre of water, then place components into solution and leave to soak, rinse with water.

General Machine Cleaning 10ml of solution in a 500ml spray bottle or 20ml per litre bottle, this is a maximum dilution rate.
